Saeid Ashrafizaveh

Data Scientist | M.Sc. Data Science CandidateContact

Information

- **Email:** saeedashrafizaveh@gmail.com
- **Phone**: +49 176 66048171
- **Address:** Alfred-Jung-Str. 14, 13353 Berlin, Germany
- **Date of Birth:** October 24, 1991
- **Google Scholar:** https://scholar.google.com/citations?hl=en&pli=1&user=EwVWLnEAAAAJ
- **GitHub:** https://github.com/SAEID-ASHRAFIZAVEH
- **LinkedIn:** www.linkedin.com/in/saeid-ashrafizaveh-839820291

Education

M.Sc. Data Science (Current)
University of Europe for Applied Sciences (UE) | Potsdam, Germany | Expected 2027

- **Relevant Coursework:** Deep Learning, NLP & Computer Vision, MLOps & Cloud, Big Data Engineering

M.Sc. Veterinary Histology
Iran | Completed

B.Sc. Pulp and Paper Engineering
Iran | Completed

Professional Summary

Data Scientist with 2+ years of remote experience in biotech and academic research, building predictive models and delivering data-driven insights. Currently advancing expertise through an M.Sc. in Data Science, specializing in Deep Learning and NLP. Combines a strong research background, evidenced by 240+ citations, with 8 years of practical industrial experience in process optimization. Seeking to apply machine learning and analytical skills to solve complex challenges in technology and research.

Technical Skills

- Programming & Databases: Python (Scikit-learn, Pandas, NumPy), SQL
- Machine Learning: Predictive Modeling, Classification, Computer Vision, Natural Language Processing (NLP), Deep Learning
- Data Analysis & Tools: Statistical Analysis, Data Wrangling, Data Visualization, Excel, SPSS, Power BI

- Concepts: MLOps, Big Data Engineering, Time-Series Analysis, IoT Analytics, Experiment Design
- Languages: English (Proficient), German (Improving), Persian (Native)

Professional Experience

Data Scientist (Remote)

- *Medical University of Gdańsk, Poland | Sep 2023 - Sep 2024*
- Developed, tuned, and validated machine learning models to support academic research for a Nobelium Prize laureate.
- Conducted data acquisition, preprocessing, and inferential statistical analysis to inform study design and interpretation.
- Created reproducible code, technical documentation, and dashboards to support manuscript and grant reporting.

Data Scientist & Apprentice (Remote)

- *Guangzhou Zhuo Sheng Biotechnology Co., Ltd., China | 2022 - 2023*
- Performed exploratory data analysis and built predictive/classification models for research and product analytics.
- Supported data collection, curation workflows, and translated findings into clear reports for technical and non-technical stakeholders.
- Collaborated with cross-functional R&D teams on experiment design and evaluation.

Warehouse Worker

- *Urmia University, Iran | 2014 - 2019* (5 years)
- Managed inventory, logistics, and distribution of university supplies, ensuring efficient and safe warehouse operations.

Research & Publications

1. **"Long non-coding RNAs in the doxorubicin resistance of cancer cells"** (2021) *Cancer Letters 508* | Citations: 175
2. **"The role of SOX family transcription factors in gastric cancer"** (2021) *International Journal of Biological Macromolecules 180* | Citations: 68

To Whom It May Concern,

This is to certify that **Mr. Saeid Ashrafizaveh** was employed at Urmia University from **2014 to 2019**, for a total of five years.

During his tenure, he served as a **Warehouse Worker** within the university's logistics and supply department. Mr. Ashrafizaveh was responsible for a variety of critical tasks essential to our daily operations, including:

- Receiving, inspecting, and storing incoming university supplies and equipment.
- Picking, packing, and preparing orders for distribution to various departments.
- Maintaining accurate inventory records and performing regular stock checks.
- Ensuring the warehouse was kept organized, clean, and safe at all times.
- Operating standard warehouse tools and equipment responsibly.

Throughout his employment, Mr. Ashrafizaveh proved himself to be a diligent, reliable, and honest employee. He carried out his duties with a strong sense of responsibility and was a valuable member of our team.

We wish him the very best in all his future endeavors.

Sincerely,

Dr. Rasool Shahrooze

Head of Logistics / Warehouse Manager

Urmia University

To Whom It May Concern,

This letter serves to formally verify that **Saeid Ashrafizaveh** was remotely engaged by **Guangzhou Zhuo Sheng Biotechnology Co., Ltd.** for a total period of one year spanning **2022 to 2023**. During this tenure, he first completed a **four-month apprenticeship** with our organization, immediately followed by an **eight-month appointment as a Data Scientist**. Ashrafizaveh carried out these duties within our research and product analytics functions under the supervision of **Distinguished Professor Yu Tian of Huizhou University**, who provides academic leadership to our company. This confirmation reflects our internal employment records and is issued at the request of the employee for the purpose of presenting verified work experience to a prospective employer.

Throughout the apprenticeship phase and subsequent Data Scientist role, Ashrafizaveh was responsible for supporting data collection and curation workflows; conducting exploratory and statistical analyses; developing, validating, and iterating predictive and classification models; and translating findings into clear reports and dashboards for technical and non-technical stakeholders. He collaborated effectively with cross-functional colleagues in R&D and product teams, contributed to experiment design and evaluation, and adhered to responsible data management practices. We found Ashrafizaveh to be diligent, dependable, and receptive to feedback, showing steady growth from the apprenticeship into independent ownership of data science tasks and delivery of actionable insights that informed business and research decisions.

Based on the above, Guangzhou Zhuo Sheng Biotechnology Co., Ltd. confirms that **Ashrafizaveh** successfully completed a continuous one-year engagement with us, consisting of **four (4) months as an apprentice** followed by **eight (8) months as a Data Scientist**, concluding in **2023**. This letter is issued upon the employee's request, without financial obligation to the company, and may be presented to any third party for the sole purpose of employment verification. Should you require additional details such as specific start and end dates, confirmation of duties, or corroboration from the supervising faculty member, please contact our CEO and Founder, Prof. Yu Tian in email of Tian_Yu@ben.edu, and we will be pleased to assist.

Prof. Yu Tian

CEO and Founder of Guangzhou Zhuo Sheng Biotechnology Co., Ltd

Science Research Center, Huizhou Central People's Hospital, Huizhou, Guangdong, China

Email: Tian_Yu@ben.edu

To Whom It May Concern,

This letter confirms that Saeid Ashrafizaveh was appointed as a remote Data Scientist under the supervision of Professor Mohammad Reza Saeb, Department of Pharmaceutical Chemistry, Medical University of Gdańsk, ul. J. Hallera 107, 80-416 Gdańsk, Poland, from September 2023 to September 2024. Professor Saeb, a Nobelium Prize laureate in Poland and a member of the aforementioned department, commissioned Mr Ashrafizaveh to provide data-driven support for his research projects. The work was conducted fully remotely, with deliverables submitted electronically and regular progress meetings held via teleconference.

During this period, Mr Ashrafizaveh's responsibilities included data acquisition and preprocessing; exploratory and inferential statistical analysis; development, tuning and validation of predictive/machine-learning models; preparation of reproducible code and technical documentation; and the creation of figures, dashboards and written summaries to support manuscripts and grant reporting. He worked closely with Professor Saeb and the research team to translate experimental aims into well-specified analytical pipelines, ensured compliance with data integrity and confidentiality requirements, and delivered outputs to agreed timelines, informing study design decisions and interpretation of results.

According to our records, Mr Ashrafizaveh satisfactorily fulfilled these duties throughout the period stated. This letter is issued at his request solely for the purpose of employment/experience verification. For any further information such as confirmation of specific project titles, scope of work or references, please contact Professor Mohammad Reza Saeb at mrsaeb2008@gmail.com.

Sincerely,

Professor Mohammad Reza Saeb

Department of Pharmaceutical Chemistry

Medical University of Gdańsk

Issued 21st December 2025. futurelearn.com/certificates/spy4jbr

Certificate of Achievement

SAEID ASHRAFIZAVEH

has completed the following course:

GETTING STARTED WITH GENERATIVE AI
PRAGMATIC AI LABS

In this course you gained a solid foundation in generative AI, how it works, and how to apply it to build robust applications.

3 weeks, 5 hours per week

Alfredo Deza
Adjunct Professor at Duke University
Pragmatic AI Labs

The person named on this certificate has completed the activities in the attached transcript. For more information about Certificates of Achievement and the effort required to become eligible, visit futurelearn.com/proof-of-learning/certificate-of-achievement.

This certificate represents proof of learning. It is not a formal qualification, degree, or part of a degree.

TRANSCRIPT

SAEID ASHRAFIZAVEH

has completed the following course:

GETTING STARTED WITH GENERATIVE AI

PRAGMATIC AI LABS

97%
OVERALL SCORE

This course provided high-level overview of generative AI concepts as well as hands-on labs for exploring and applying different techniques when working with Large Language Models (LLMs) as well as small language models.

STUDY REQUIREMENT

3 weeks, 5 hours per week

LEARNING OUTCOMES

- Apply different prompt engineering techniques for enhancing generative AI output
- Develop Generative AI software solutions.
- Create automation based on powerful generative AI patterns

SYLLABUS

- Learn what generative AI is and how it's evolved from early AI to the large language models used today
- Learn the fundamentals of prompt engineering to interact effectively with generative AI models
- Explore more advanced skills like breaking down tasks, chaining prompts, and other techniques to overcome context limitations
- Explore different types of generative AI applications, including API-based, embedded-model, and multi-model systems
- Learn the fundamentals of building robust applications using techniques like Retrieval Augmented Generation (RAG) to improve context
- Gain hands-on experience testing an application locally and deploying it on the cloud using tools like Azure

Certificate of Achievement

SAEID ASHRAFIZAVEH

has completed the following course:

MACHINE LEARNING FOR IMAGE DATA
THE UNIVERSITY OF NOTTINGHAM AND UNIVERSITY OF LINCOLN

This course looked at the use of machine learning using image data, and discussed feature extraction, image labelling and pre-processing. We covered both supervised and unsupervised methods, the common tasks of classification, clustering, and regression, and introduced some deep learning concepts.

5 weeks, 3 hours per week

Andrew French
Professor of Computer Science
The University of Nottingham

University of Nottingham
UK | CHINA | MALAYSIA

UNIVERSITY OF LINCOLN

The person named on this certificate has completed the activities in the attached transcript. For more information about Certificates of Achievement and the effort required to become eligible, visit futurelearn.com/proof-of-learning/certificate-of-achievement.

This certificate represents proof of learning. It is not a formal qualification, degree, or part of a degree.

TRANSCRIPT

University of Nottingham

UNIVERSITY OF LINCOLN

SAEID ASHRAFIZAVEH

has completed the following course:

MACHINE LEARNING FOR IMAGE DATA

THE UNIVERSITY OF NOTTINGHAM AND UNIVERSITY OF LINCOLN

The course looked at the use of machine learning, particularly in the context of plant image data collected experimentally, and discussed feature extraction, labelling, and pre-processing. We covered both supervised and unsupervised methods, the common tasks of classification, clustering, and regression, and ways to train, visualise, and evaluate models using the Python packages Scikit-Learn, Matplotlib and Pandas. Finally, we discussed how deep learning techniques differ from machine learning.

STUDY REQUIREMENT

5 weeks, 3 hours per week

LEARNING OUTCOMES

- Explain what machine learning is, and how it relates to image data
- Perform simple image labelling and pre-processing tasks
- Classify supervised, unsupervised and semi-supervised machine learning techniques
- Code some simple machine learning scripts using Python Scikit-Learn
- Describe some common machine learning tasks, such as clustering, regression, and classification
- Investigate deep learning, and how it differs from machine learning

SYLLABUS

- What is machine learning? Key concepts
- Supervised versus unsupervised learning
- Software tools – Python Scikit-Learn
- Common tasks and terminology
- Data and features
- Feature extraction
- Labelling images
- Image pre-processing
- Common techniques
- Clustering
- Classification
- Regression
- Evaluation, visualisation, and selection
- Tips and tricks
- Good training practice
- Data augmentation
- Common challenges
- Introduction to Deep learning
- Deep learning vs machine learning
- Neural networks
- Some simple tools

TRANSCRIPT

Future Learn

SAEID ASHRAFIZAVEH

has completed the following course:

INTRODUCTION TO DATA ENGINEERING WITH MICROSOFT AZURE 1

FUTURELEARN

This course explored various data platform technologies, and how a Data Engineer can take advantage of this technology. Learners learned the basics of storage management in Azure, creating and managing data pipelines in the cloud using Azure Data Factory, and using Azure Synapse Analytics to perform different types of analytics. Learners explored the tools and techniques used to work with Modern Data Warehouses and learned to perform data engineering with Azure Synapse Apache Spark Pools.

STUDY REQUIREMENT

6 weeks, 4 hours per week

LEARNING OUTCOMES

- Explore how the world of data has evolved and how the advent of cloud technologies is providing new opportunities for business to explore.
- Explore the basics of storage management in Azure, how to create a Storage Account, and how to choose the right model for the data you want to store in the cloud.
- Create and manage data pipelines in the cloud using Azure Data Factory.
- Perform different types of analytics through Azure Synapse Analytics components.
- Explore the tools and techniques that can be used to work with Modern Data Warehouses productively and securely within Azure Synapse Analytics.
- Perform data engineering with Azure Synapse Apache Spark Pools to boost the performance of big-data analytic applications by in-memory cluster computing.

SYLLABUS

Understanding the evolving world of data

Survey the services on the Azure Data Platform

Identify the tasks of a Data Engineer in a cloud-hosted architecture

SAEID ASHRAFIZAVEH

has completed the following course:

INTRODUCTION TO CYBER SECURITY
THE OPEN UNIVERSITY

98%
OVERALL SCORE

We shop online. We work online. We play online. We live online. As our lives increasingly depend on digital services, the need to protect our information from being maliciously disrupted or misused is really important. This online course provides a foundation to understanding online security & protecting your digital life, whether at home or work. Having completed the course, learners will be able to recognise cyber security threats & the steps that can be taken to reduce the chances of these.

STUDY REQUIREMENT
8 weeks, 3 hours per week

LEARNING OUTCOMES
- Explain basic cyber security terminology; have skills for keeping up to date on cyber security issues; and be able to identify information assets.
- Describe basic authentication mechanisms; have skills to improve their password security; and be aware of alternative authentication methods.
- Identify main malware types; awareness of different malware propagation methods; and skills for preventing malware infections.
- Describe cryptography terminology; be able to use cryptography for email; be aware of applications of cryptography.
- Demonstrate understanding of firewalls, virtual private networks and network intrusion detection and prevention technologies.
- Describe legal and regulatory issues relating to cyber security; and understand how to recover from security failures.
- Apply basic risk analysis and management techniques.

SYLLABUS
- Threat landscape: terminology, cyber security threats, keeping up to date
- Authentication: access control, passwords, two-factor authentication
- Malware: types of malware, attack vectors, preventing infection
- Networking and communications: fundamentals, security challenges, standards
- Cryptography: symmetric and asymmetric cryptography, applications
- Network security: firewalls, virtual private networks, intrusion detection / prevention
- When your defences fail: cyber security laws, recovering from attacks
- Managing security risks: risk analysis and management

has completed the following course:

INTRODUCTION TO DATA ANALYTICS WITH PYTHON

FUTURELEARN

This online course explored the basic concepts of the Python programming language and how its libraries can be used for data analytics applications. Topics included advanced data analytics and basic semantics, functions, and data structures. It highlighted the essential operations and functions of Pandas, a data analysis library, and Seaborn, a data visualisation library, and provided opportunities for learners to apply their skills through practical scenario-based activities.

STUDY REQUIREMENT

4 weeks, 3 hours per week

LEARNING OUTCOMES

- Apply the basic elements of the Python language for data analytics.
- Apply advanced data operations using the Python package: Pandas.
- Demonstrate data ingestion and data wrangling operations in Pandas.
- Develop, enhance, and customise data visualisations using the Python plotting library: Seaborn.

SYLLABUS

- Advanced data analytics
- Basics of Python programming language
- Introduction to Python's data analytics library: Pandas
- Introduction to Python's data visualisation library: Seaborn

Coventry University

SAEID ASHRAFIZAVEH

has completed the following course:

THE CYBER SECURITY LANDSCAPE
COVENTRY UNIVERSITY

This online course explored how to demonstrate a systematic understanding of relevant knowledge about organisations, their external context and how they are managed; demonstrate an understanding of the changing cyber threat landscape and the developments in cyberspace and appropriate techniques.

STUDY REQUIREMENT
2 weeks, 5 hours per week

LEARNING OUTCOMES
- Demonstrate a systematic understanding of relevant knowledge about organisations, their external context and how they are managed
- Demonstrate an understanding of the changing cyber threat landscape and the developments in cyberspace
- Apply knowledge to a range of situations including IT security, finance, accounting, and organisational behaviour, taking account of the inter-relationships of these topics and their interactions with the business and the industry and external environment
- Demonstrate an understanding of appropriate techniques sufficient to allow detailed investigation into relevant cybersecurity management issues

SYLLABUS
- Current and emerging security implications
- Networks and security, loss of the traditional LAN and LAN perimeter
- Consumerisation of corporate technology through apps, tablets and smartphones
- Client-side threats, web-server security, web-applications security
- Operating system security
- Concepts, problems, and issues related to modern technologies
